Before finishing up and taking our Module 2 Unit test (watch Infinite Campus for updated standard scores) we explored Topic E: represent and comparison problems.

Topic E led us to the vocabulary words *comparison* and *equal*. After much math talk about the words *comparison* and *equal*, we began working.

While still working with word problems, this time we had to find how many more are in one group than another group. To do this, we had to recognize the part that makes the two quantities unequal. We worked together to see we could choose the parts as: the extra amount or as the amount needed to make the quantities equal.
