Assignments Validation verifies the status of assignments that have multiple section placements and/or multiple alignments.
The most common reason to validate a section is the addition or removal of the teacher(s) scheduled to a section. If a section's scheduled teacher has changed, the assignments must be validated.
For example, if a teacher placed an assignment in two sections and was removed from one section, the Assignment Validation process splits the assignment and a unique assignment remains in each section.
If alignments under an assignment are no longer valid, they are split into separate assignments. If separate assignments within a section contain alignments which can be consolidated within one assignment, they will be combined into one assignment. Assignments Validation also validates categories and activities.
This may take several minutes to complete, click OK to validate now.
