

Car Wash

Safety Tip

Water activities should be done under supervision of parent.

How do we do it?

What Do We Need?

- ✓ Bucket of water
- ✓ Sponges
- ✓ Towel
- ✓ Baby shampoo or wash
- ✓ Cars, trucks, tricycle, play dishes, or baby dolls

1. Provide a bucket of warm sudsy water, various sponges and brushes and a dry towel.
2. Let the child wash and dry their tricycle or toys using sponges and brushes.

What's in it for us?

- ❖ Children learn with their senses. They experience the sensation of the water, feel the bubbles, smell the scent of the baby wash, and feel the texture of the brushes and towels.
- ❖ Introduce new vocabulary words: dirty, clean, sudsy, soapy, etc.
- ❖ Kids learn about cause and effect. They see that when something is dirty, washing it makes it clean.
