

# Creative Collage

## Safety Tip

Very young children may rub their eyes when using glitter, glue or paint. Stay close by and be prepared to intervene and wash hands.

## How do we do it?

### What Do We Need?

- ✓ Paper
- ✓ Glue sticks
- ✓ Old butter tub to hold some "White School Glue" and a glue "brush" which can be a popsicle stick or Q-Tip to help apply the glue to the objects
- ✓ Variety of collage materials: cotton balls, pom poms, paper scraps, stickers, pasta noodles, old silk flowers, leaves, glitter, spare photos, wiggly eyes, ribbon, yarn, feathers, etc.
- ✓ Plastic cover for table

1. Glue objects on paper.

2. Let dry and enjoy!

### What's in it for us?

- ❖ Children develop creative inspiration when exploring novel objects. There is no right or wrong way to make art.
- ❖ Children experiment with shape, color, texture, wet and dry, sticky and smooth textures.
- ❖ Fine motor skills are developed as they apply the glue and stick it to paper.
