## JC Schools 7th Grade Yearly Math Standards

## Overarching Standards (Taught in all units)

7.NS.A. 3

Solve problems involving the four arithmetic operations with rational numbers.

| Units | Priority Standards | Supporting Standards |
| :---: | :---: | :---: |
| Unit 1 <br> Rational <br> Numbers: <br> Integers <br> 13 Days <br> Unit End Date: <br> Sept. 9 <br> Unit Assessment <br> Window: Sept. 1-16 | 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses). <br> f. Interpret sums and differences of rational numbers. <br> 7.NS.A.2.b,f <br> Apply and extend previous understandings of numbers to multiply and divide rational numbers. <br> b. Determine that a number and its reciprocal have a product of 1 (multiplicative inverse). <br> f. Interpret products and quotients of rational numbers by describing real-world contexts. | 7.NS.A.1.a,b,d,e <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> a. Add and subtract rational numbers. <br> b. Represent addition and subtraction on a horizontal or vertical number line. <br> d. Understand subtraction of rational numbers as adding the additive inverse. <br> e. Determine the distance between two rational numbers on the number line is the absolute value of their difference. <br> 7.NS.A.2.a, c-e <br> Apply and extend previous understandings of numbers to multiply and divide rational numbers. <br> a. Multiply and divide rational numbers. <br> c. Understand that every quotient of integers (with non-zero divisor) is a rational number. <br> d. Convert a rational number to a decimal. <br> e. Understand that all rational numbers can be written as fractions or decimal numbers that terminate or repeat. |

| 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses) |  |  |
| :---: | :---: | :---: |
| Unit 3 <br> Ratios and Proportions <br> 13 Days <br> Unit End Date: <br> Nov. 12 <br> Unit Assessment <br> Window: Nov. 5-19 | 7.GM.A. 1 <br> Solve problems involving scale drawings of real objects and geometric figures, including computing actual lengths and areas from a scale drawing and reproducing the drawing at a different scale. <br> 7.RP.A.2.a-c <br> Recognize and represent proportional relationships between quantities. <br> a. Determine when two quantities are in a proportional relationship. <br> b. Identify and/or compute the constant of proportionality (unit rate). <br> c. Explain what a point ( $x, y$ ) on the graph of a proportional relationship means in terms of the situation. <br> 7.RP.A. 3 <br> Solve problems involving ratios, rates, percentages and proportional relationships. | 7.RP.A. 1 <br> Compute unit rates, including those that involve complex fractions, with like or different units. <br> 7.RP.A.2.d <br> Recognize and represent proportional relationships between quantities. <br> d. Recognize that the graph of any proportional relationship will pass through the origin. |

| 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses) |  |  |
| :---: | :---: | :---: |
| Unit 4 <br> Percents <br> 20 Days <br> Unit End Date: <br> Dec. 15 <br> Unit Assessment Window: <br> Dec. 8-Jan. 5 | 7.RP.A. 3 <br> Solve problems involving ratios, rates, percentages and proportional relationships. <br> 7.EEI.B.3.b <br> Solve multi-step problems posed with rational numbers. <br> b. Assess the reasonableness of answers using mental computation and estimation strategies. | 7.EEI.B.3.a <br> Solve multi-step problems posed with rational numbers. a. Convert between equivalent forms of the same number. |
| Unit 5 <br> Expressions, Equations, and Inequalities | 7.EEI.B.4.b-c <br> Write and/or solve linear equations and inequalities in one variable. <br> b. Write and/or solve two-step equations of the form $p x+q=r$ and $p(x+q)=r$, where $p, q$ and $r$ are rational numbers, and interpret the meaning of the solution in the context of the problem. | 7.EEI.B.4.a <br> Write and/or solve linear equations and inequalities in one variable. <br> a. Write and/or solve equations of the form $x+p=q$ and $p x=q$ in which $p$ and $q$ are rational numbers. |

| 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses) |  |  |
| :---: | :---: | :---: |
| 28 Days <br> Unit End Date: <br> Feb. 8 <br> Unit Assessment Window: Feb. 1-15 | c. Write, solve and/or graph inequalities of the form px $+q>r$ or $p x+q<r$, where $p, q$ and $r$ are rational numbers. <br> 7.EEI.A. 1 <br> Apply properties of operations to simplify and to factor linear algebraic expressions with rational coefficients. <br> 7.EEI.A. 2 <br> Understand how to use equivalent expressions to clarify quantities in a problem. |  |
| Unit 6 <br> Area, Volume, and Surface Area <br> 20 Days <br> Unit End Date: | 7.GM.B.6.a,b <br> Understand the relationship between area, surface area and volume. <br> a. Find the area of triangles, quadrilaterals and other polygons composed of triangles and rectangles. <br> b. Find the volume and surface area of prisms, pyramids and cylinders. <br> 7.GM.A.4.a,b <br> Understand concepts of circles. | 7.GM.A. 3 <br> Describe two-dimensional cross sections of pyramids, prisms, cones and cylinders. |

| 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses) |  |  |
| :---: | :---: | :---: |
| March 9 <br> Unit Assessment Window: <br> Mar. 2-16 | a. Analyze the relationships among the circumference, the radius, the diameter, the area and Pi in a circle. <br> b. Know and apply the formulas for circumference and area of circles to solve problems. |  |
| Unit 7 <br> Probability <br> 18 Days <br> Unit End Date: <br> April 11 <br> Unit Assessment Window: <br> Apr. 4-18 | 7.DSP.C.5.a,b <br> Investigate the probability of chance events. <br> a. Determine probabilities of simple events. <br> b. Understand that the probability of a chance event is <br> a number between 0 and 1 that expresses the likelihood of the event occurring. | .DSP.C.6.a-c <br> Investigate the relationship between theoretical and experimental probabilities for simple events. <br> a. Predict outcomes using theoretical probability. <br> b. Perform experiments that model theoretical probability. <br> c. Compare theoretical and experimental probabilities. <br> 7.DSP.C.7.a,b <br> Explain possible discrepancies between a developed probability model and observed frequencies. <br> a. Develop a uniform probability model by assigning equal probability to all outcomes, and use the model to determine probabilities of events. |

| 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses) |  |  |
| :---: | :---: | :---: |
|  |  | b. Develop a probability model (which may not be uniform) by observing frequencies in data generated from a chance process. <br> 7.DSP.C.8.a,b <br> Find probabilities of compound events using organized lists, tables, tree diagrams and simulations. <br> a. Represent the sample space of a compound event. <br> b. Design and use a simulation to generate frequencies for compound events. |
| Unit 8 | 7.DSP.A.1.b | 7.DSP.A.1.a,c |
| Statistics | Understand that statistics can be used to gain information about a population by examining a sample of the population. | Understand that statistics can be used to gain information about a population by examining a sample of the population. |
| 11 Days | b. Understand that generalizations from a sample are valid only if the sample is representative of the | a. Understand that a sample is a subset of a population. <br> c. Understand that random sampling is used to produce |
| Unit End Date: April 26 | population. | representative samples and support valid inferences. |
| Unit Assessment Window: | 7.DSP.B. 3 | 7.DSP.A. 2 |
| April 19-May 3 | Analyze different data distributions using statistical measures. |  |

| 7.NS.A.1.c, f <br> Apply and extend previous understandings of numbers to add and subtract rational numbers. <br> c. Describe situations and show that a number and its opposite have a sum of 0 (additive inverses) |  |  |
| :---: | :---: | :---: |
|  |  | Use data from multiple samples to draw inferences about a population and investigate variability in estimates of the characteristic of interest. <br> 7.DSP.B. 4 <br> Compare the numerical measures of center, measures of frequency and measures of variability from two random samples to draw inferences about the population. |
| Unit 9 <br> Angle Relationships <br> 14 Days <br> Unit End Date: <br> May 16 <br> Unit Assessment Window: <br> May 9-23 | 7.GM.B. 5 <br> Use angle properties to write and solve equations for an unknown angle. | 7.GM.A.2.a,b <br> Use a variety of tools to construct geometric shapes. <br> a. Determine if provided constraints will create a unique triangle through construction. <br> b. Construct special quadrilaterals given specific parameters. |

7.NS.A.1.c, f

Apply and extend
previous
understandings
of numbers to add and subtract rational numbers.
c. Describe
situations and
show that a number and its
opposite have a
sum of 0
(additive
inverses)
