## JC Schools Algebra I Yearly Math Standards

## Overarching Standards

## A1.NQ.B. 3

Use units of measure as a way to understand and solve problems involving quantities.
a. Identify, label, and use appropriate units of measure within a problem.
b. Convert units and rates.
c. Use units within problems.
d. Choose and interpret the scale and the origin in graphs and data displays.

## A1.NQ.B. 4

Define and use appropriate quantities for representing a given context or problem.
A1.NQ.B. 5
Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.

## A1.CED.A. 3

Represent constraints by equations or inequalities and by systems of equations or inequalities and interpret the data points as a solution or non-solution in a modeling context.

| Units | DESE Priority Standards | District Priority Standards | Supporting Standards |
| :--- | :--- | :--- | :--- |
| Unit 1 | A1.CED.A.1 <br> Create equations and <br> inequalities in one variable and <br> use them to model and/or solve <br> problems. | A1.CED.A.4 <br> Solve literal equations and formulas for <br> a specified variable that highlights a <br> quantity of interest |  |
|  |  |  |  |
| Inequalities | A1.REI.A.1 <br> Explain how each step taken when <br> solving an equation or inequality in one |  |  |

|  |  | variable creates an equivalent equation or inequality that has the same solution(s) as the original. |  |
| :---: | :---: | :---: | :---: |
| Unit 2 <br> Polynomial Operations <br> 17 Days | A1.SSE.A. 1 <br> Interpret the contextual meaning of individual terms or factors from a given problem that utilizes formulas or expressions. <br> A1.SSE.A. 2 <br> Analyze the structure of polynomials to create equivalent expressions or equations. | A1.NQ.A. 1 <br> Explain how the meaning of rational exponents extends from the properties of integer exponents <br> A1.NQ.A. 2 <br> Rewrite expressions involving radicals and rational exponents using the properties of exponents. Limit to rational exponents with a numerator of 1. <br> A1.APR.A. 1 <br> Add, subtract, and multiply polynomials, and understand that polynomials follow the same general rules of arithmetic and are closed under these operations. <br> A1.APR.A. 2 <br> Divide polynomials by monomials. |  |
| Unit 3 <br> Introduction to Functions <br> 17 Days | A1.LQE.B. 4 <br> Write arithmetic and geometric sequences in recursive and explicit forms and use them to model situations and translate between the two forms. | A1.IF.A. 2 <br> Use function notation to evaluate functions for inputs in their domains and interpret statements that use function notation in terms of a context. <br> A1.LQE.A. 1 <br> Distinguish between situations that can be modeled with linear or exponential functions. <br> a. Determine that linear functions change by equal differences over equal intervals. | A1.IF.A.1.a-b <br> Understand that a function from one set (domain) to another set (range) assigns to each domain element exactly one element of the range. <br> a. Represent a function using function notation. <br> b. Understand that the graph of a function labeled $f$ is the set of all ordered pairs $(x, y)$ that satisfy the equation $y=f(x)$. <br> A1.IF.C. 9 |

\(\left.\left.\left.$$
\begin{array}{|l|l|l|l|}\hline & & \begin{array}{l}\text { b. Recognize exponential situations in } \\
\text { which a quantity grows or decays by a } \\
\text { constant percent rate per unit interval. }\end{array} & \begin{array}{l}\text { Compare the properties of two } \\

\text { increasing linearly or quadratically. }\end{array}
$$\right] \begin{array}{l}A1.LQE.B.5 <br>
Recognize that sequences are <br>
functions, sometimes defined <br>
recursively, whose domain is a subset <br>

of the set of integers.\end{array}\right\}\)| A1.LQE.B.6 |
| :--- |
| Find the terms of sequences given an |
| explicit or recursive formula. |

|  | A1.IF.C. 7 <br> Graph functions expressed symbolically and identify and interpret key features of the graph. <br> A1.LQE.A. 3 <br> Construct linear, quadratic and exponential equations given graphs, verbal descriptions or tables. |  | A1.IF.B. 5 <br> Determine the average rate of change of a function over a specified interval and interpret the meaning. <br> A1.IF.B. 6 <br> Interpret the parameters of a linear or exponential function in terms of the context. |
| :---: | :---: | :---: | :---: |
| Unit 5 <br>  <br> Graphing <br> Quadratic <br> Functions <br> 17 Days | A1.BF.A. 1 <br> Analyze the effect of translations and scale changes on functions. <br> A1.REI.C. 6 <br> Explain that the graph of an equation in two variables is the set of all its solutions plotted in the Cartesian coordinate plane. <br> A1.IF.B. 3 <br> Using tables, graphs, and verbal descriptions interpret key characteristics of a function that models the relationship between two quantities. <br> A1.IF.C. 7 <br> Graph functions expressed symbolically and identify and interpret key features of the graph. <br> A1.LQE.A. 3 | A1.CED.A. 2 <br> Create and graph linear, quadratic, and exponential equations in two variables. <br> A1.IF.C. 8 <br> Translate between different but equivalent forms of a function to reveal and explain properties of the function and interpret these in terms of a context. | A1.IF.A. 1 <br> Understand that a function from one set (domain) to another set (range) assigns to each domain element exactly one element of the range. <br> a. Represent a function using function notation. <br> b. Understand that the graph of a function labeled $f$ is the set of all ordered pairs $(x, y)$ that satisfy the equation $y=f(x)$. <br> A1.IF.B. 4 <br> Relate the domain and range of a function to its graph and, where applicable, to the quantitative relationship it describes. <br> A1.IF.C. 9 <br> Compare the properties of two functions given different representations. |

|  | Construct linear, quadratic and exponential equations given graphs, verbal descriptions or tables. |  |  |
| :---: | :---: | :---: | :---: |
| Unit 6 <br> Factoring \& Solving Quadratic Functions <br> 25 Days | A1.SSE.A. 1 <br> Interpret the contextual meaning of individual terms or factors from a given problem that utilizes formulas or expressions. <br> A1.SSE.A. 2 <br> Analyze the structure of polynomials to create equivalent expressions or equations. <br> A1.REI.A.2c <br> Solve problems involving quadratic equations <br> c. Analyze different methods of solving quadratic equations. <br> A1.CED.A. 1 <br> Create equations and inequalities in one variable and use them to model and/or solve problems. | A1.SSE.A.3.a <br> Choose and produce equivalent forms of a quadratic expression or equations to reveal and explain properties. <br> a. Find the zeros of a quadratic function by rewriting it in factored form. <br> A1.REI.A.2.a, <br> Solve problems involving quadratic equations. <br> a. Use the method of completing the square to create an equivalent quadratic equation. | A1.SSE.A.3.b <br> Choose and produce equivalent forms of a quadratic expression or equations to reveal and explain properties. <br> b. Find the maximum or minimum value of a quadratic function by completing the square. <br> A1.REI.A.2.b <br> Solve problems involving quadratic equations. <br> b. Derive the quadratic formula. |
| Unit 7 <br> Exponential Functions <br> 17 Days | A1.REI.C. 6 <br> Explain that the graph of an equation in two variables is the set of all its solutions plotted in the Cartesian coordinate plane. <br> A1.BF.A. 1 | A1.CED.A. 2 <br> Create and graph linear, quadratic, and exponential equations in two variables. <br> A1.IF.C. 8 <br> Translate between different but equivalent forms of a function to reveal | A1.IF.A. 1 <br> Understand that a function from one set (domain) to another set (range) assigns to each element of the domain exactly one element of the range. <br> a. Represent a function using function notation. |

|  | Analyze the effect of translations and scale changes on functions. <br> A1.IF.B. 3 <br> Using tables, graphs, and verbal descriptions interpret key characteristics of a function that models the relationship between two quantities <br> A1.IF.C. 7 <br> Graph functions expressed symbolically and identify and interpret key features of the graph. <br> A1.LQE.A. 3 <br> Construct linear, quadratic and exponential equations given graphs, verbal descriptions or tables. | and explain properties of the function and interpret these in terms of a context. <br> A1.LQE.A. 1 <br> Distinguish between situations that can be modeled with linear or exponential functions. <br> a. Determine that linear functions change by equal differences over equal intervals. <br> b. Recognize exponential situations in which a quantity grows or decays by a constant percent rate per unit interval. | b. Understand that the graph of a function labeled $f$ is the set of all ordered pairs $(x, y)$ that satisfy the equation $y=f(x)$. <br> A1.IF.B. 4 <br> Relate the domain and range of a function to its graph and, where applicable to the quantitative relationship it describes. <br> A1.IF.B. 5 <br> Determine the average rate of change of a function over a specified interval and interpret the meaning. <br> A1.IF.B. 6 <br> Interpret the parameters of a linear or exponential function in terms of the context. <br> A1.IF.C. 9 <br> Compare the properties of two functions given different representations. <br> A1.LQE.A. 2 <br> Describe, using graphs and tables, that a quantity increasing exponentially eventually exceeds a quantity increasing linearly or quadratically. |
| :---: | :---: | :---: | :---: |
| Unit 8 <br> Systems | A1.REI.C. 8 Solve problems involving a system of linear inequalities. | A1.REI.B. 3 <br> Solve a system of linear equations algebraically and/or graphically. <br> A1.REI.B. 4 | A1.REI.B. 5 <br> Justify that the technique of linear combination produces an equivalent system of equations. |

| 17 Days |  | Solve a system consisting of a linear equation and a quadratic equation algebraically and/or graphically. <br> A1.CED.A. 3 <br> Represent constraints by equations or inequalities and by systems of equations or inequalities and interpret the data points as a solution or non-solution in a modeling context. |  |
| :---: | :---: | :---: | :---: |
| Unit 9 <br> Statistics <br> 21 Days | A1.DS.A. 1 <br> Analyze and interpret graphical displays of data. | A1.DS.A. 4 <br> Summarize data in two-way frequency tables. Interpret relative frequencies in the context of the data, and recognize possible associations and trends in the data. <br> A1.DS.A. 5 <br> Construct a scatter plot of bivariate quantitative data describing how the variables are related; determine and use a function that models the relationship. <br> a. Construct a linear function to model bivariate data represented on a scatter plot that minimizes residuals. <br> b. Construct an exponential function to model bivariate data represented on a scatter plot that minimizes residuals. <br> A1.DS.A. 8 <br> Distinguish between correlation and causation. | A1.DS.A. 2 <br> Use statistics appropriate to the shape of the data distribution to compare the center and spread of two or more different data sets. <br> A1.DS.A. 3 <br> Interpret differences in shape, center, and spreads in the context of the data sets, accounting for possible effects of outliers. <br> A1.DS.A. 6 <br> Interpret the slope (rate of change) and the y-intercept (constant term) of a linear model in the context of the data. <br> A1.DS.A. 7 <br> Determine and interpret the correlation coefficient for a linear association. |
